RE: Number of Quarters of Employment for CRT Clients during FY2007

This week's PIP provides information on the number of quarters in FY2007 during which adults with serious mental illness served by Vermont's Community Rehabilitation and Treatment (CRT) programs were employed. The report is based on analysis of data obtained from Vermont DMH Designated Agencies and from the Vermont Department of Employment and Training (DET). Previous reports in this series are available online at: (<http://healthvermont.gov/mh/docs/pips/pip-cross-sector-indicator.aspx#emp>). This PIP compliments our standard quarterly reports that provide monthly and annual employment rates by providing more detail on those CRT clients who were employed at some time during FY2007 in Vermont.

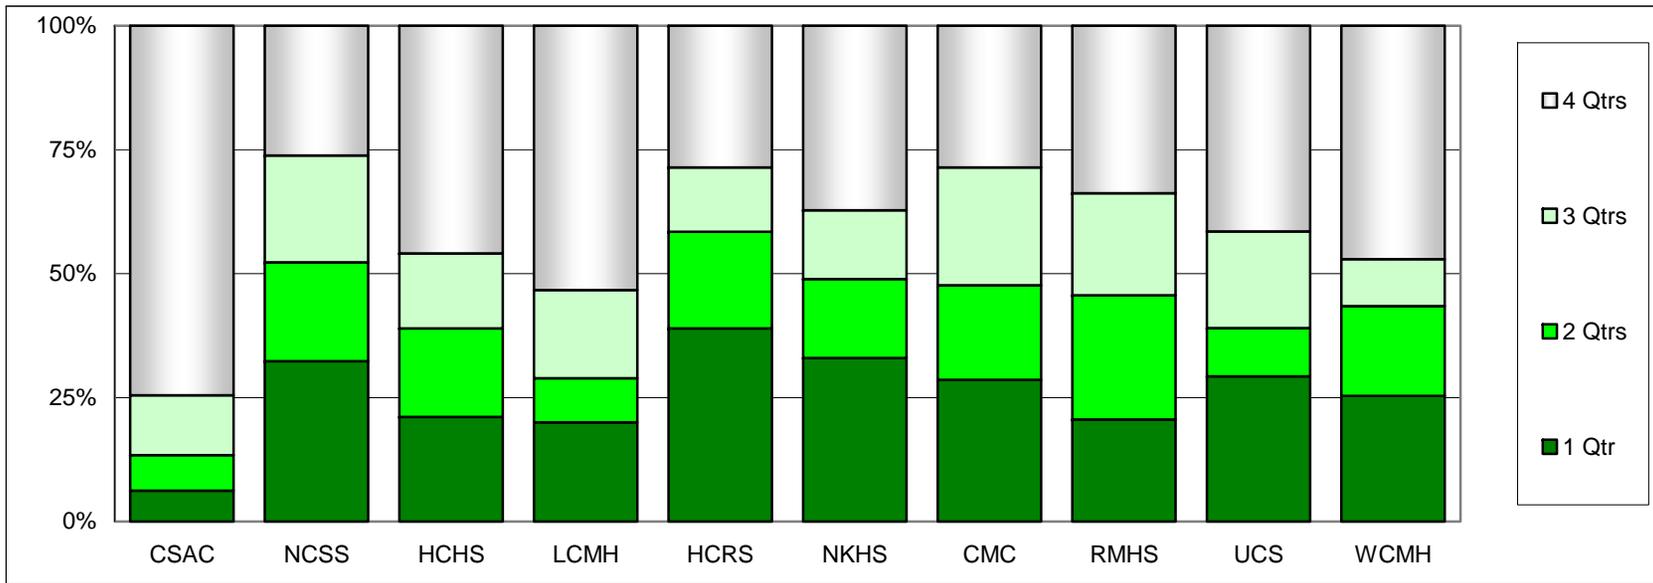

Overall, 27% of all CRT clients were employed in Vermont at some time during FY2007. Washington County Mental Health Services (WCMH) and Lamoille County Mental Health Services (LCMH) had the highest proportions of CRT clients who were employed at some time during FY2007 (34% and 33% respectively). The Health Care and Rehabilitation Services of Southeast Vermont (HCRS) had the lowest proportion (20%).

Statewide, of those CRT clients who were employed in Vermont during FY2007, 26% were employed during only one of four quarters, 17% were employed during two quarters, 15% were employed during three quarters, and 41% were employed during all four quarters. The proportion of employed CRT clients who were employed during all four quarters varied from 65% in the Counseling Service of Addison County (CSAC) and 53% in LCMH, to 26% in the Northwest Counseling and Support Services (NCSS). The proportion of employed CRT clients who were employed during only one quarter of FY2007 varied from 19% in CSAC to 39% in HCRS.

We look forward to your comments and your suggestions for further analyses of these data at pip@vdh.state.vt.us or 802.863.7249.

CRT Clients: Number of Quarters Employed in FY2007

	Total CRT Clients #	Number of Quarters Worked in FY2007										CRT Clients Employed in any Quarter	
		None		1 Qtr		2 Qtrs		3 Qtrs		4 Qtrs		#	%
CSAC	167	119	71%	9	19%	3	6%	5	10%	31	65%	48	29%
NCSS	240	175	73%	21	32%	13	20%	14	22%	17	26%	65	27%

Analysis includes all employment reported for Community Rehabilitation and Treatment clients aged 18-64 who were active during any part of the reporting period.

This report is based on monthly data provided by the community mental health providers and quarterly data provided by the Department of Employment and Training (DET). All CRT clients with a valid SSN are included in this analysis. DET data are submitted by Vermont employers in conformance with state and federal unemployment laws. Workers who are excluded from Vermont DET reporting are the self-employed, firm owners not incorporated and the following employee groups: elected officials, employees of nonprofit religious, charitable and educational organizations, unpaid family members, farm workers (with some exceptions), railroad employees, and individuals employed outside of Vermont.
