RE: Employment of CRT Clients: Q4 of FY2019

This week's brief report provides FY2019 fourth quarter employment rates for clients served by Vermont's Community Rehabilitation and Treatment (CRT) programs for adults with serious mental illness. This report also includes rates for fourth quarters (April through June) of nine previous fiscal years, FY2010 through FY2018. Previous reports regarding employment rates are available online at:

<https://mentalhealth.vermont.gov/reports-forms-and-manuals/reports/statistical-reports-and-data>.

This report, like previous reports in this series, is based on analysis of client data submitted to the Vermont Department of Mental Health (DMH) by designated community mental health agencies and Vermont employment data submitted to DMH by the Vermont Department of Labor (DOL).

As you will see, statewide fourth quarter CRT employment rates bounce around from a low of 13.8% in FY2011, to a high of 16.8% in FY2015, to 16.1% in FY2019.

During the fourth quarter of FY2019, Addison had the state's highest employment rate (23.0%), followed by Washington (21.9%). The lowest employment rates were in Pathways and Southeast (4.3% and 8.0%, respectively).

Statewide, average fourth quarter earnings per employed CRT client stayed relatively consistent with a very slight decrease from \$2,871 in the fourth quarter of FY2018 to \$2,863 in the fourth quarter of FY2019.

During the fourth quarter of FY2019, Lamoille had the highest reported fourth quarter earnings per employed client (\$3,845), followed by Pathways (\$3,723) and Northeast (\$3,197). The lowest fourth quarter earnings per employed client were in Southeast (\$2,306), Bennington (\$2,487) and Washington (\$2,663).

As always, we look forward to your comments and your suggestions for further analyses of these data. You can reach us by e-mail at [ahs.dmhpip@vermont.gov](mailto:ahs.dmhpip@vermont.gov).

# Statewide CRT Employment Rates and Average Earnings

## Fourth Quarter (Apr-Jun) of Fiscal Years 2010 - 2019

	Fourth Quarter of Fiscal Year									
	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>	<u>2019</u>
% Employed	15.4	13.8	14.8	15.6	17.6	16.8	16.2	15.9	15.5	16.1
\$ per Employed Client	2,297	2,318	2,363	2,457	2,375	2,572	2,747	2,602	2,871	2,863

This report is based on analysis of the Vermont Department of Mental Health (DMH) and Department of Labor (DOL) databases. DMH client data are submitted by community programs in conformance with contractual requirements. DOL data are submitted by employers in conformance with state and federal laws. Workers who are excluded from DOL reporting are the self-employed, firm owners not incorporated and the following employee groups: elected officials, employees of nonprofit religious, charitable and educational organizations, unpaid family members, farm workers (with some exceptions), railroad employees, and employment in neighboring states. Analysis includes Community Rehabilitation and Treatment (CRT) clients aged 18 - 64 who were active during each reporting quarter and includes all employment reported for each quarter. Quarterly employment rates are lower than annual employment rates because not all clients who are employed during a year are employed during every quarter of the year.

# CRT Clients Employed

## Fourth Quarter (Apr-Jun) of Fiscal Years 2010 - 2019

This report is based on analysis of the Vermont Department of Mental Health (DMH) and Department of Labor (DOL) databases. DMH client data are submitted by community programs in conformance with contractual requirements. DOL data are submitted by employers in conformance with state and federal laws. Workers who are excluded from DOL reporting are the self-employed, firm owners not incorporated and the following employee groups: elected officials, employees of nonprofit religious, charitable and educational organizations, unpaid family members, farm workers (with some exceptions), railroad employees, and employment in neighboring states. Analysis includes Community Rehabilitation and Treatment (CRT) clients aged 18 - 64 who were active during each reporting quarter and includes all employment reported for each quarter. Quarterly employment rates are lower than annual employment rates because not all clients who are employed during a year are employed during every quarter of the year.
